HTML input type="file" - W3Schools

https://www.w3schools.com/tags/att_input_type_file.asp

The `<input type="file">` defines a **file-select** field and a "Browse" button for **file** uploads. To define a **file-select** field that allows multiple **files** to be selected, add the `multiple` attribute. Tip: Always add the `<label>` tag for best accessibility practices!

Bootstrap 4 File Input - examples & tutorial. Basic ...

<https://mdbootstrap.com/docs/b4/jquery/forms/file-input>

Bootstrap **File Input** is a field which the user can use to upload one or more **files** (photos, documents or any other **file type**) from local storage. Standard **file inputs** usually leave a lot to be desired in terms of design, but MDB takes care of that by enhancing them with Material Design best practices. Some of the most common use examples are:

html - Styling an input type="file" button - Stack Overflow

<https://stackoverflow.com/questions/572768>

20/02/2009 · `$(input[type=file]).bind('change', function() { var str = ""; str = $(this).val(); $("#filename").text(str); }).change();` Tah dah! You may need to parse the `val()` to something more meaningful but you should be all set.

Styling file inputs are notoriously difficult, as most browsers will not change the appearance from either CSS or javascript. Even the...
